

Your 2000-calorie meal plan

Cornerstones4Care™

The importance of healthy eating

Eating healthy is an important part of managing your diabetes. The food in your meal plan will provide the calories and nutrients you need each day to manage your blood sugar and give you the energy you need for healthy living.

You can use the following guidelines to estimate how many calories you need each day to help maintain your weight.

For every pound of weight, calculate:

- 10 calories for an adult who is obese or inactive
- 13 calories for an adult with a low activity level or over 55 years of age
- 15 calories for an adult who is somewhat active
- 18 calories for an adult who is very active

To lose weight, you will need to eat fewer calories. To gain weight, you will need to eat more calories. Ask your doctor to refer you to a registered dietitian (RD). This person can help you make a meal plan. You want to have the right balance of food, medicine, and activity.

Choose your foods: Exchange lists for diabetes

The Exchange Lists offer a large selection of foods grouped together because they have about the same nutritional content. Each serving of a food has about the same carbohydrate, protein, fat, and calories as the other foods in that list. Any food within a list can be "exchanged" for another food in the same list.

Ask your diabetes care team for a copy of the **Cornerstones4Care** booklet, *Carb Counting and Meal Planning*, from Novo Nordisk. It includes the Exchange Lists for Diabetes and other useful information on healthy eating. Use the Exchange Lists in *Carb Counting and Meal Planning* with this meal-planning information.

2000-calorie meal plan

For more information about meal planning, go to Cornerstones4Care.com and take advantage of our online Menu Planner to create a 7-day menu plan, including diabetes-friendly recipes and a customized grocery list.

The following sample menu for a 2000-calorie meal plan includes a total of 8 starch exchanges, 4 fruit exchanges, 4 milk exchanges, 4 nonstarchy vegetable exchanges, 7 meat exchanges, and 6 fat exchanges daily.

Meal	Exchanges	Sample
Breakfast	1 starch	$\frac{3}{4}$ cup unsweetened, ready-to-eat cereal
	1 starch	1 slice whole-grain toast
	1 milk	1 cup fat-free milk
	1 meat, high fat	1 tablespoon peanut butter
	free food	2 teaspoons low-sugar jelly
Snack	1 fruit	1 extra-small banana (4 ounces)
	1 starch	3 graham crackers, 2½-inch square
	1 milk	1 cup fat-free milk
Lunch	2 starch + 2 lean meat	2 cups split pea soup
	1 free food	1 cup mixed salad greens
	2 vegetable	2 cups raw vegetables (for example, carrots and celery)
	2 fat	4 tablespoons reduced-fat salad dressing
	1 fruit	1 medium peach (6 ounces)
Snack	1 milk	$\frac{2}{3}$ cup (6 ounces) reduced-fat plain yogurt
	1 fruit	1 cup raspberries
Dinner	1 starch	1 cup baked acorn squash
	1 starch	1 small dinner roll
	3 meat, lean	3 ounces baked salmon
	2 vegetable	1 cup cooked nonstarchy mixed vegetables
	3 fat	3 teaspoons butter or margarine
	1 fruit	2 small tangerines
Snack	1 starch	1 slice whole-grain bread
	1 meat, lean	1 ounce low-salt ham
	1 fat	1 tablespoon reduced-fat mayonnaise
	1 milk	1 cup fat-free milk
